ABOUT US

TEZ is a pioneering software developer that creates cloud-based, app-free mobile solutions to enhance end-user customer experiences in the parking and hospitality industries. By digitizing service with TEXT2PARK®, SMS Valet®, PERMIT2PARK® and TEXT4SERVICE®, operators and owners speed up service and streamline operations, generating more revenue. Founded in 2011 by the team that created and patented market-disrupting restaurant paging systems in 1993, TEZ develops innovative and simple mobile technology solutions that offer operators real-time reporting, enforcement tools and a comprehensive audit trail to maximize accountability and profitability in a simple SaaS interface. TEZ platforms facilitated more than 18,000,000 transactions throughout the US and Latin America last year. For more information, follow us on LinkedIn or visit www.tezhq.com

Dallas/Fort Worth Metroplex, Southern US 51-100 employees, private, established January 1, 2011.
Address: 5000 Legacy Dr., Suite 360, Plano, TX 75024. Main number 866-366-8391

EXECUTIVES

Ken Lovegreen - CEO

Ken and his partners developed the flashing restaurant pager in 1993 under their company, Long Range Systems (LRS). The LRS Coaster Call has become the worldwide standard in guest paging for many industries. After 25 patents, Ken sold LRS in 2011 to dedicate his full attention to his new company, TEZ.

Steve Resnick - CRO

Steve Resnick has over 25 years of diverse experience in business development and operational capacities, supporting public and private-sector parking and mobility programs pursued through competitive RFP processes. Steve brings a deep commitment to business success as Chief Revenue Officer at TEZ through collaboration with colleagues, peers, and industry partners.

Greg Selllik - CFO

Greg Sellick is CFO at TEZ, overseeing the firm's accounting and business operations. Prior to TEZ, Greg was VP of Finance, Lanier Parking & AmeriPark, LLC, for Citizens Lanier Holdings – the largest parking operator in the South Eastern US with gross transactional revenues exceeding \$350M annually.

PRODUCTS

SMSVALET

Touchless, cashless SMS Valet is used to manage valet parking operations. Two-way texting improves communication between staff and parkers. Contactless payments speed up check-in and increase tips.

PERMIT2PARK

PERMIT2PARK revolutionized how monthly parking is managed. Competitively priced and scalable, this cloud-based mobile solution gives parkers control to update accounts and more but data belongs to the operator.

TEXT2PARK

TEXT2PARK is a cloud-based parking management platform that helps businesses easily manage their spaces and multiple lots. Parkers quickly park and pay using smart phones. Cashless. App-free. Easy.

PRESS

TESTIMONIALS

You probably love this as much as I do but I need to tell you that your support agent Mason is hands down, head and shoulders, the best. Not to say that the other support agents aren't awesome as well, because they always are, everytime. I just have not personally, or as a business, ever had someone give so much attention, and without asking, the kind of attention to something as Mason did tonight, with our interests and concerns at heart.

Chicago Valet Parking, Inc.

When I first started using SMS Valet, I was surprised that many operations still used outdated paper ticket systems instead of advanced technology. These days, it's about your business surviving. If you don't offer a contactless experience, it's a reason to switch providers. SMS Valet is an app-free solution that provides that and much more.

Corinthian Parking and Transportation

In the industry, we worked with OObeo, Flash, SMSV—all providers. In northeast and NY region especially, Propark recommends TEZ to clients because of a comfort level--TEZ is a trusted partner.
